About Me

I am an analytical and detail-oriented professional with an Informatics background and 3+ years of Presales experience, combining business operations expertise with data analytics skills. I support business operations through customer requirements analysis, pricing data management, ERP data maintenance, reporting, and technology recommendations. I have completed end-to-end analytics projects involving data cleaning, exploratory analysis, statistical analysis, forecasting, SQL, Python, and dashboard development. My experience has strengthened my analytical thinking, problem-solving, attention to detail, and stakeholder communication skills. I combine technical data skills with business operations experience to translate data into actionable insights and support informed business decisions.

Project Experiences

Customer Churn Prediction & Retention Strategy | Telkom x RevoU **Sep 2026 - Oct 2026**

Machine learning case study focused on churn prediction and customer retention.

- Analyzed customer, billing, subscription, usage, network, complaint, and churn data using SQL, covering 20K customers and Rp58.17B revenue.
- Applied SHAP to identify key churn drivers and prioritized 324 high-risk customers from 4,000 test records to support proactive retention strategies.

Customer Analytics | Telkom x RevoU **Sep 2026**

Customer analytics case study focused on customer value, network experience, and retention.

- Analyzed customer, billing, subscription, usage, network, complaint, and churn data using SQL, covering 20K customers and Rp58.17B in revenue.
- Built a Power BI dashboard to monitor network quality 81.7, 20.4K complaints, and 90.0% retention, highlighting customer behavior and operational trends.

Working Experiences

Presales | Koperasi Konsumen Karyawan PT. Aplikanusa Lintasarta **Mar 2023 - Present**

- Prepared 3–6 daily BOQs using Microsoft Excel, collecting and validating product, pricing, and quantity data to support accurate quotations and reporting.
- Maintained and validated pricing data for 10,000+ products in Odoo ERP, coordinating with vendors for data accuracy.
- Analyzed customer requirements and translated business needs into technology recommendations.

Product Operations Intern | Innocircle Initiative **Aug 2021 - Dec 2021**

- Maintained and validated 1,000+ product, customer, partner, and sales records to support accurate operational data management.
- Created 5 weekly content briefs, poster drafts, and social media captions to support product promotion.
- Wrote weekly product-focused blog articles to increase product awareness.
