About Me

Analytical and detail-oriented Informatics Engineering graduate with experience in Presales and Product Operations, passionate about turning business needs into data-driven insights. Combining professional experience in Presales and Product Operations with hands-on data analytics projects using SQL, Python, and visualization tools to solve business problems. Managed pricing proposals and customer requirements across diverse technology solutions, collaborating with vendors and stakeholders to deliver accurate recommendations while strengthening my analytical and problem-solving skills. Combining technical expertise in data analysis tools with experience in stakeholder collaboration and requirement gathering, I am prepared to bridge business needs with data-driven solutions. With a strong foundation in business operations, analytical problem-solving, and continuous learning, I am excited to leverage data to drive meaningful business impact as a Data Analyst.

Education

POLITEKNIK NEGERI CILACAP

Sep 2019 - Oct 2022
